Adobe Express for Education

PRODUCTION PORTALS & DEPLOYMENT SPECIFICATION

STATUS: DEPLOYED & ACTIVE

Platform: GitHub Pages

Verification: HTTP 200 OK

Official production links and architecture summary for the Adobe Express for Education digital platform. The system is architected with complete physical role separation: students have zero interface or access to educator credentials, professional development modules, or curriculum administration.

LIVE PRODUCTION LINKS

PORTAL	DEDICATED LIVE LINK	DESCRIPTION & FEATURES
Student Site Independent Application 100 percent Student-Only	https://kushagrakushwah.github.io/Adobe-Dashboard/student/	**100 percent Student-Only Studio:** • Dedicated student header with zero teacher links or references. • 4-Step workflow: Select Month -> Watch Tutorial -> Open Activity -> Submit. • 12-Month activity dashboard (January through December) with keyboard arrow navigation. • Direct project links for YouTube video tutorials, Adobe Express project templates, and Google Form assignment submissions.
Teacher Site Independent Application 100 percent Educator-Only	https://kushagrakushwah.github.io/Adobe-Dashboard/teacher/	**100 percent Educator-Only Hub:** • Dedicated educator header with zero student links. • Section A: Adobe ID and Password panel (institutional login, password security, recovery link, and SSO instructions). • Section B: 5 Continuous Professional Development (CPD 1 to 5) modules with objectives, curated resources, assignments, and submissions. • Section C: DCAIS E-Modules, Teacher Manual, DCAIS Book, and 4-module activity tree (12 activities). • Real-time search filter across modules and activities.
Portal Gateway Central Router	https://kushagrakushwah.github.io/Adobe-Dashboard/	**Central Landing Page:** • Executive landing portal directing incoming traffic to either isolated site. • Program metrics overview (5 CPD modules, 12 monthly challenges, 16+ DCAIS projects, 100 percent free for schools). • Bilingual language switch (English and Hindi).

IMPLEMENTATION SUMMARY (IN SHORT)

Key Architecture & System Highlights

- **Total Interface Isolation:** The student environment is completely isolated from the teacher portal. Students cannot navigate to, inspect, or interface with educator credentials, CPD coursework, or teacher manuals.
- **Adobe Spectrum Design Standards:** Implemented using official Adobe color tokens (#FA0F00 Adobe Red, #C90D00 Dark Red, #141414 Charcoal, #F4F4F6 Neutral Gray) with high-elevation card hierarchy and accessible focus states.
- **Bilingual Localization:** Complete English and Hindi toggle with instant dynamic text updates and local storage preference persistence.
- **Zero-CORS Dual-Mode Architecture:** Employs a decoupled CMS data model along with a zero-dependency standalone provider that guarantees seamless offline execution as well as live server hosting.
- **Production Deployment:** Hosted and live on GitHub Pages with automated build workflows and verified HTTP 200 availability across all endpoints.
